

Africa's first and largest *Hospital-at-home*

+ Hospital-Level Care at Home

Get the same high-quality care you would in a hospital—in your home.

+ Covered By Most Medical Aids

Affordable and accessible care that works with your medical aid.

+ Faster, Better Recovery

Heal quicker in the comfort of your own space with personalised care.

+ Around-the-clock Monitoring

Stay safe and connected with 24/7 remote health monitoring.

Welcome to *Quoro Medical*

We deliver premium healthcare solutions that are **more accessible and affordable for everyone.**

The Good News?

We take care of everything and bring all the essential elements of in-hospital-care to your home.

The Even Better News?

Healing at home is proven to be safer and more comfortable, leading to quicker recoveries and better health outcomes.

Do You Qualify?

You qualify for our care if you are 18 or older, unwell enough to need care typically provided in a hospital general ward, and have been referred by your doctor.

Typical HAH Conditions include:

Infections

- Community-Acquired Pneumonia (lung infections)
- COVID19
- Skin and soft tissue infections (Cellulitis)
- Bladder or Kidney infections (UTI)

Chronic conditions with frequent exacerbations/flare-ups

- Acute exacerbation of COPD
- Acute exacerbation of Asthma
- Acute exacerbation of Congestive Cardiac Failure

Other

- Diabetes
- Post Surgery
- Dehydration
- Deep vein thrombosis
- Stable Pulmonary Embolism
- Post MI
- Nose bleeds (Epistaxis)
- Minor strokes (TIA)
- Syncope/Collapse

Or any other condition deemed appropriate by the referring doctor.

When is HAH appropriate?

INSTEAD OF HOSPITALISATION: Patients who would ordinarily be admitted to a general ward requiring ongoing monitoring and treatment.

EARLY HOSPITAL DISCHARGE: Patients initially admitted to the hospital whose clinical condition has stabilised but still require ongoing hospital-level monitoring and care.

POST-HOSPITAL DISCHARGE: Patients at high risk of deterioration after hospital discharge following an acute admission or procedure.

We know that when you need us, you won't be feeling your best. **That's why we're here to support you through this time and help you recover as quickly as possible.**

Here Are Our Three Offerings:

1 Remote Patient Monitoring

- Admission cycle of around 5-7 days
- 24/7 virtual vital signs monitoring
- Daily virtual consultations with our clinicians
- 24/7 access to a Quro Medical's Clinical Command Centre team
- Continuous care by your treating doctor and/or our Quro doctors
- Short-term home oxygen, if needed
- Ambulance services, if needed

2 Hospital-At-Home

- **All services offered in Remote Patient Monitoring PLUS**
- Daily visits for around 3 days, or more frequently where needed
- Blood tests
- Wound care
- Medication and/or fluids via a drip
- Allied healthcare services, including Physiotherapy

3 Transitional Care Programme

TCP facilitates a safe, timely transition from hospital to home post-discharge, providing proactive, evidence-based support to prevent hospital readmission.

- 30-days Remote vital sign monitoring
- Daily virtual engagements with a healthcare professional.
- A dedicated care team to help you manage medication and schedule follow-up appointments with your primary doctor.
- 24/7 access to a clinical team for any concerns about your medical condition.

TCP is available to select medical scheme members only.

Our Admission Is Easy

- 1 Visit your doctor and have a consultation to decide if Quro Medical is a good option for you.

- 2 We handle the pre-authorization and will then get in touch with you. Most medical schemes cover these costs through the hospital benefit or you can select a cash-paying option.

- 3 Once approved, a member of our clinical team team will meet you at your home (or at the hospital if you are currently admitted).

- 4 Relax and recover from home with our 24/7 monitoring, regular check-ins, consultations, and ongoing support from the treating doctor.
